Express Outreach Project Award Enhances Patient Care

The Laupus Library, Family Medicine Center, and ECU Physicians have partnered to bring four computer kiosks to several family medicine clinics administered by ECU. These clinics have all been slated to receive a kiosk which houses a computer, printer, and Internet connection for patients to access good, quality information while they await their appointments. The ultimate goal of the project is to help enhance office visits with information that the patients themselves can access, print out, and take home with them.

The four clinics to receive the kiosks are the Family Medicine Clinic, the Monk Geriatric Center, the Firetower Road Office and the Bethel Family Medical Clinic. These kiosks will use existing wireless Internet networks to access online databases from the National Library of Medicine called MedlinePlus. A printer is available in each kiosk. Before or after a doctor visit, patients can find more information about their medical condition before they leave the doctor’s office.

The library was awarded four “mini-grants” called the Express Outreach Project Award from the National Networks of the Libraries of Medicine (NN/LM), the University of Maryland, Baltimore. The total for all awards is $29,468.

The kiosks are anticipated to arrive in mid to late May. Laupus Library staff will assist with the installation and training of medical office staff in the use of the kiosks.

(article continued on page 2)
Now, patients will have reliable information on the spot, when they need it. Jeff Coghill, project leader and Head of Outreach at Laupus Library, noted, “We are excited to bring these kiosks to the clinics so that patients can help manage their own care and learn more about their own health while they have an appointment in the doctor’s office.”

Other project leaders from Laupus Library include Katherine Rickett and Roger Russell. Jaime Messenger, Clinical Assistant Professor, served as the project leader for Family Medicine.

Leadership Grant Calls For University Partnerships

The School of Hospitality Leadership at ECU will partner with Laupus Library and Joyner Library on a one year project funded by a BB&T Leadership grant. The goals of this project are to identify the key elements of leadership that must be integrated into the curriculum of the new School of Hospitality Leadership to ensure maximum exposure to and application of the concepts and best practices of leadership in all facets of hospitality management; and to develop reusable learning modules and materials for integrating evidence-based leadership principles into the hospitality leadership curriculum.

Librarians from both libraries will collaborate with faculty from the school in order to co-develop learning objects to achieve the stated goals. Online self-paced instruction “modules” will be created by the librarians, and in close consultation with the course instructor.

This project should provide opportunities for instructors to work with their students to, as the BB&T leadership grant application indicates, “enable students to develop awareness, appreciation, sensitivity, and capacity for becoming positive change leaders in society.” The proposal focuses on evidence-based leadership and the use of information as a leadership tool for effective decision making.

The project will also serve to test the proof of concept that librarians co-teaching or closely integrated into course curricula can have a positive impact on learning.

Laupus Welcomes New Employees for 2012

Ashleigh Munden joined the Laupus Library staff in February of this year and works as a University Library Technician for Access Services. Ashleigh opens and closes the library, covers the service desk in the evenings, and manages and updates Symphony ILS (Integrated Library System). Ashleigh was a former student worker for the Access Services department from 2008 to 2011. Ashleigh graduated from ECU May 2011 with Bachelors of Science in Biology.

Jamaal Jaynes joined Laupus Library in March as a student worker for Access Services. Jamaal works the service desk during evenings and weekends. Jamaal has been an ECU student since August of 2011 and is pursuing a degree in criminal justice from the College of Human Ecology.
A Message From the Director

It is hard to believe another academic year is coming to a close! Laupus faculty and staff were busy this year with creative new projects and personal accomplishments. Most recently, Laupus and Joyner Libraries in collaboration with the College of Human Ecology were awarded a $10,000 BB&T Leadership Challenge Grant to foster Evidence-based Leadership in the Hospitality Leadership Curriculum. The National Network / Libraries of Medicine awarded a grant of $29,500 to EAHEC/Laupus Library Outreach Services for patient and consumer health education kiosks to be placed in four ECU Physicians clinical service areas. Jennifer Walker, our CON Liaison was awarded a $1000 EBSCO grant scholarship to attend the 2012 Medical Library Association meeting in Seattle.

This summer we look forward to placing a new custom built exhibit case in the Family Medicine Center to host rotating exhibits from the Country Doctor Museum and work also continues on a special exhibit on the history of dentistry to open in conjunction with the opening of the School of Dental Medicine’s new permanent home, Ross Hall.

The activities of the Program Prioritization Committee (PPC) challenged us to educate the university community about the critical role Laupus Library plays in providing quality health information to the Division of Health Sciences, ECU and throughout eastern North Carolina. In an effort to achieve the administrative and operational efficiencies and economies requested by the PPC, we will work with our Joyner colleagues to draft and implement strategic plans that address the needed administrative and operational efficiencies and economies.

I would also like to remind you that July 1st will mark the 3rd anniversary of the founding of our Friends of Laupus Library group. Over the past three years the generous support of our Friends helped underwrite the Health Sciences Author Recognition program as well as a variety of lectures and activities presented in conjunction with our History of Medicine and gallery exhibit programs. When the Friends group was established, a special giving opportunity, The Founding Friends, was announced. Members who donate a cumulative gift of $1,000 level or greater by June 30, 2012 will receive special recognition as a Founding Friend.

As this campaign nears its end date, there is still time to make a gift at the $1,000 level or above. For those current Friends who have given at lower giving levels during this period but who wish to be recognized as a Founding Friends, there is still have time to make an additional gift to the Friends to reach the Founding Friends giving threshold. Individuals wishing to join the Friends or to confirm the level of their past giving should call Kelly Rogers Dilda at 744-2232 or email rogerske@ecu.edu for further information.

All at Laupus Library hope you have a restful, productive and safe summer.

Sincerely,

Dorothy A. Spencer, PhD
Director, Laupus Library
Associate Vice Chancellor
Communication & Information Resources

Laupus Liaison Awarded EBSCO Grant

Jennifer Walker, liaison to the College of Nursing, was awarded $1,000 to attend the Medical Library Association’s (MLA) annual meeting in Seattle, Washington. The grant, sponsored by EBSCO Information Services, aims to encourage attendance and participation by early-career librarians who have between two and five years’ experience as a health sciences librarian. Up to four grants per year are awarded to assist with travel and conference-related expenses.

This will be Jennifer’s second year for attending MLA's annual meeting, and she plans to make the most of her time in Seattle. “Last year’s meeting proved to be a bit overwhelming for me as a first-time attendee, but I truly enjoyed the atmosphere and the mentoring. It also showed me ways I can get involved. Based on my attendance last year, I joined an awards jury and submitted two papers to this year’s conference,” she said. In addition to her participation, Jennifer hopes “the expertise and knowledge I can gain from my colleagues through attendance and participation will allow me improve on resources and services to Laupus Library users.”

Jennifer will receive her award at a recognition luncheon during the conference in May.
Founding Friends to Be Recognized on Donor Board

Citizens of eastern North Carolina have watched with pride and gratitude as ECU’s Division of Health Sciences has grown to serve the health care needs of our region. We invite you to become a part of this dynamic growth at our academic medical center through annual membership in the Friends of Laupus Library.

In July of 2009, the Friends of Laupus Library was established in an effort to support our mission of providing access to quality information in Eastern North Carolina. The Friends serves to provide much needed advocacy and support for the Library, the health sciences community and East Carolina University through participation in Friends programs, special events and awareness activities.

We invite you to become a member of the Friends to help ensure this unique and critical regional resource and the many programs it offers to the community can continue. While we offer several levels of annual membership, a special category, Founding Friend, was created to recognize individuals and/or couples giving a total of at least $1000 through July of 2012. These outstanding donors will be designated as a Founding Friend on a special donor board to be dedicated in late 2012.

We hope you will join us at a level that best meets your ability to support the library’s important health educational, research and patient care programs. As a member you will learn more about the contributions of Laupus Library to the growth and success of the medical and health sciences community at East Carolina University and throughout eastern North Carolina.

For more information about the Friends of Laupus Library please contact Kelly Rogers Dilda at 252-744-2232 or rogerske@ecu.edu. You are also encouraged to visit our website at: www.ecu.edu/LaupusLibrary/Friends.

Health Sciences Author Recognition Awards: Registration Open

Registration is now open for the 2012 Health Sciences Author Recognition Awards. This program provides an opportunity for both faculty and staff to be honored for their published research and scholarly contributions to their area of study.

The awards program was designed in 2005 to pay tribute to our many health sciences authors who have expanded and enriched the scholarly culture of our university and the reputation of the Division of Health Sciences through publication of peer-reviewed works. Laupus Library is pleased to continue hosting this annual tradition to celebrate academic achievement.

The awards ceremony will be held on the evening of November 13th at the Greenville Hilton. All Health Sciences faculty and staff who have been published in books and peer-reviewed journals between July 1, 2011 and June 30, 2012 are eligible to submit registration. Please visit: www.ecu.edu/cs-dhs/laupuslibrary/HSAR/index.cfm for eligibility criteria, registration form, and bibliographies from the 2005 - 2011 programs.
Laupus Participates in the MedPrint National Journal Retention Effort

Laupus Library is a proud participant in the MedPrint print journal retention program. This national program was developed by the National Network of Libraries of Medicine (NN/LM) and the National Library of Medicine (NLM) as a way to ensure the preservation of and continued access to the literature.

Since 2000, U.S. medical libraries increasingly have shifted their journal subscriptions from traditional print to the electronic journal version to meet user expectations of immediate access to material 24 hours a day. While this shift has freed limited physical space in libraries, libraries also have come under pressure to give up physical space to other areas of their parent organizations, and thus have had to discard print holdings of some, many, or all of their journal titles - limiting access to the years/volumes available online.

The aim of MedPrint is to ensure that thirteen print copies of 250 journals identified as primary titles in medicine are retained across the country, with equitable distribution across the NN/LM regions in the U.S. These print copies must be 95% complete, include graphics that are readable, colors in proper tones, and that all other parts of the print journal are available- including advertisements and administrative matter, which can provide context for the article and the time period in which it was published. This allows libraries to feel confident that if their particular circumstance means they must discard desirable print titles or if electronic information becomes suddenly unavailable, other libraries will have complete copies of this material available to borrow.

Laupus will be retaining eight complete journal subscriptions for this effort. For more information about MedPrint, please see www.nlm.nih.gov/psd/print_retention_about.html.

Laupus Expands Operating Hours

In response to recent user surveys and suggestions, Laupus Library has extended regular hours of operation. The Library will be open later on Friday and Saturday evenings. In addition, hours will remain the same through the summer. These changes are a direct result of our users providing us with good and frequent feedback, and of our funding and staffing being able to support the personnel changes needed.

First Library Hosted Food n’ Fun Break Appreciated by Students

Laupus Library hosted its first ever Food ‘n Fun’ break for its students on Thursday, April 25th from 7-10 p.m. The idea was initiated by the library’s user experience task force who wanted to provide a fun respite to students studying for their final exams.

Once the idea was hatched the group immediately went into action! A coffee and doughnut break was organized at noon to refresh those students who had been diligently studying throughout the morning. Over 40 students stopped by to fuel up, chat, and generally take a mental breather.

Starting at 7 p.m., the group opened up two first floor rooms where a variety of board games (sponsored by Blue Ox Games), Nintendo Wii games, and even a puzzle table were set up for students to stop by, take a break, and do something fun to ease the tension of impending exams! Food and drinks were provided on behalf of the library, and over 50 students from a variety of different programs stopped by to grab a snack and have a little fun.

Laupus Library staff oversaw the event, facilitating games, providing refreshments, and gathering feedback. Students unanimously reported on how fun the event was, and their desire that the library do more events like it. The ‘Food ‘n Fun’ break was so successful that the group would like to make it an annual event, to help students survive the stress of exam week.

Any additional feedback regarding the event can be directed to Ginny Boyer at boyerg@ecu.edu.
Faculty and Staff Invited to Exhibit Art in an Ongoing Series

Laupus Library launched the opening of the Art as Avocation series in January of 2012 to showcase and celebrate through a gallery exhibit, the artistic talents and self-expression of faculty and staff from the Division of Health Sciences. The success of this first exhibit confirmed our belief that our faculty and staff have many artistic talents waiting to be shared.

In order to continue this exciting series we would like to extend an opportunity for you to exhibit and assist us in planning future exhibits. Those interested in becoming an exhibitor are invited to submit the artist’s registration form for exhibit consideration. The form is available at: www.ecu.edu/cs-dhs/laupuslibrary/events/artasavocation/becomeanexhibitor.cfm.

For more information about the series or previous exhibits please visit: www.ecu.edu/cs-dhs/laupuslibrary/events/artasavocation/index.cfm. Please direct all questions to Kelly Rogers Dilda at rogerske@ecu.edu.

ECU Health Beat: Subscribe to the DHS Blog

ECU Health Beat is a blog that serves to highlight the exciting and innovative work from the Division of Health Sciences (DHS) at ECU. The blog also performs as a communications tool for internal and external audiences (students, prospective students, media, patients, and community and business leaders) to learn about ECU’s research, programs, and other relevant happenings. ECU Health Beat enhances the reputation of ECU, highlighting the role of primary and preventive medicine in improving our state’s health while also providing a voice for state, regional, and national topics.

We invite you to visit ECU Health Beat at http://blog.ecu.edu/sites/healthbeat/ and subscribe today.

ECU-TV adds Video On Demand Service for Online Viewers

Watching dozens of ECU-TV programs is now available from nearly any computer connected to the internet. Now, viewers can watch much of the current original ECU-TV video library anytime, anywhere, in a high-quality digital media that’s optimized for viewing on the web. “We now have the capability to reach a worldwide audience,” says ECU-TV manager, Tom Skinner.

“Viewers can watch our entire online video library. You can even pause, fast forward or rewind the high quality digital videos,” he added.

In addition to the video on demand service you can also watch a live stream of what is currently airing on ECU-TV on Greenville/Pitt County SuddenLink cable channel 99. To access ECU-TV videos on demand from your computer, visit the website: www.ecu.edu/ecutv
New Materials in the History Collections Now Available

The History Collections at Laupus Library tries to support study and research in all areas of the history of the health sciences. Although some current publications on history are purchased each year, the library budget does not always permit the purchase of older works. In spring 2011, some money was available to purchase older materials.

We purchased 25 book titles published from 1807 – 2009, all but four were published before 1935 (and two of those are reprints). Most are in English but one is in French and four are in German. Most are housed in the History Collections.

Although the Library has always collected materials in dentistry, the inauguration of the School of Dental Medicine has made this subject a major focus of our collection.

We purchased 14 dental titles; most were published in the United States between 1836 and 1930. Shearjashub Spooner’s Guide to sound teeth: or, a popular treatise on the teeth, illustrating the whole judicious management of these organs from infancy to old age ... was published in 1836 in New York. Chapin A. Harris’ A physiological and pathological inquiry concerning the physical characteristics of the human teeth and gums, the salivary calculus, the lips and tongue, and the fluids of the mouth: together with their respective local and constitutional indications was published in Baltimore in 1841.

We also added a facsimile of the first printed work devoted to dentistry, the 1530 Zene artzney (also called Artzney buchlein or Medicines for the teeth). This Classics of Dentistry Library edition includes an English translation of the 1541 edition and a 1920 commentary.

Among the other purchases was the 1817 edition of Benjamin Franklin’s Some account of the Pennsylvania Hospital: from its first rise, to the beginning of the fifth month, called May, 1754. The 2009 title is the eight-volume Foundations of Modern Nursing in America, with reprints of works by M. Adelaide Nutting, Isabel Maitland Stewart, and six others. It is part of the third floor circulating collection.

In addition, we purchased many bound and unbound issues of the Annals of Medical History. This important journal was published from 1917 - 1942. Including our previous holdings, we now hold almost every issue.
Sometimes it’s hard being a part of the ECU community when your home base is a 45 minute car drive away from Greenville. Although The Country Doctor Museum is still located in Bailey, travel time will be much shorter to view some of the museum’s holdings when a new exhibit opens on ECU’s west campus this summer. Ready this June, a new display cabinet in the ECU Family Medicine Center will feature collections from the museum’s apothecary collection.

Our new exhibit cabinet for the Family Medicine Center is currently being crafted by Mr. Stuart Kent, a wood furniture maker and designer who previously created the library tables and chairs in Laupus Library’s History Programs Reading Room. The cabinet will offer ample space to showcase rotating exhibits from the museum’s collection. The first display, “Compounding Remedies: Tools of the Trade from Early Pharmacies,” will include artifacts used by country doctors and pharmacists in the making of medicines. An eye-catcher will be a turn of the century show globe, one that has not been on exhibit since ECU took over the management of the museum. Show globes (vases filled with colored liquid) were used by apothecaries, pharmacies and other drug stores to let customers know that someone in the store could compound medicine. Other artifacts will provide insight on how remedies were measured, mixed, and dispensed.

Our “home away from home” exhibit case will be located on the second floor of the Family Medicine Center. Be sure to look for it this summer.

On March 16, Joseph Parsons, Senior Editor at the University of North Carolina Press www.uncpress.unc.edu, spoke informally at Laupus Library about academic publishing. He is also the general editor of the Studies in Social Medicine monograph series. He is seeking scholarly and general interest books in the social sciences and humanities.

To find potential publishers for your book, Mr. Parsons recommended consulting the Association of American University Presses www.aaupnet.org/index.php and looking at the publishers of related books on your shelves. The best match is good for the book, the author, and the publisher. University presses often publish books that have an effect on academic disciplines. These publishers generally have a close relationship with their authors and do a good job of marketing their books. A good research project should be interesting, dynamic (either showing change or providing a good reason why there was no change), and cause the reader to ask “why didn’t I see that before?”

Most university presses have submission guidelines. He recommended submitting a cover letter and a proposal rather than the whole manuscript. Be sure to proofread everything carefully. With new authors, he often observes an improvement in writing skills in the third chapter. From the time the book gets to the press to the time it is published is usually 12 – 18 months.

He always asks the author who should and should not read the manuscript and why. These reviewers help him decide whether to publish the book and what the published reviews are likely to say. He considers who the core, secondary, and tertiary readership is likely to be.

Mr. Parsons recommended consulting Getting It Published: A Guide for Scholars and Anyone Else Serious about Serious Books from the University of Chicago Press. The Laupus Library recently acquired this publication as an e-book so everyone with access to the ECU Libraries can use it.
By the time this article is published, we’ll be enjoying some new technology in the Laupus Computer Lab. Near the beginning of the summer, we’ll be unveiling all new computers throughout the lab.

The older Dell desktops and LCD monitors will be replaced with Lenovo ThinkCentre M90z all-in-one computers. The workstation layout of the lab will remain the same with 41 PCs total and 3 iMacs. The installation of the all-ins will complete a renovation of the lab which started last summer with a redesign of the lab’s layout. New computer tables were installed to facilitate collaboration among students and the new all-ins will enhance this environment by providing more usable desktop space than the current setup.

We’re planning for the new computers to be installed during the first week after spring graduation so stop by and check them out!

The Equipment Loan Program continues to be one of the most popular services available at Laupus Library. We offer 16GB iPads with built-in Wi-Fi, and come pre-loaded with a handful of medical apps. We have plenty of laptops available and regardless of whether you prefer a PC or Mac, we can usually accommodate your preference.

Other equipment also available for loan includes multimedia projectors, digital voice recorders, digital cameras and camcorders (including the Flip Video camera), and TurningPoint audience response systems. All of our equipment is loaned on a weekly basis, with the exception of the TurningPoint bundles, which are 3-day loans.

For additional information or to place a reservation today, please visit our website at www.ecu.edu/laupuslibrary/services/EquipmentLoanProgram.cfm.

Large-format poster printing is another popular service that continues to be offered through the lab for a nominal fee. ECU faculty, staff and students can submit posters at www.ecu.edu/laupuslibrary/services/PosterPrinting.cfm and have the finished product within 24 hours. Final copies are $5/linear foot and draft copies are $4/linear foot. Poster printing is provided for ECU business or course-related work only.

OpScan exam grading is offered through the lab as well. Faculty members within the Division of Health Sciences are encouraged to take advantage of this service. All exams for OpScan must be accompanied by an OpScan Request Form (www.ecu.edu/laupuslibrary/opsan.cfm) and left in the secure drop-box located at the lab’s front desk. Exams from the Brody School of Medicine can be dropped off and picked up at the MTS office (1S-10). Faculty that wish to have their exams scanned while they wait can contact Larry Bone (bonel@ecu.edu) to setup an appointment in advance.

A variety of educational, interactive, training and board review software is provided in the computer lab to enhance the various curricula throughout the Division of Health Sciences. To facilitate group work, the lab offers two Collaborative Resource Centers (CRC’s) that feature large LCD displays and speakers to provide audio if needed. Large 4x6’ dry-erase boards are available in both CRC rooms to provide another means of composing ideas and brainstorming with others. The Assistive Technology Center is available for students with specific needs; it features an adjustable-height workstation, Optelec Clearview video magnifier, and JAWS® screen-reading software.

For questions regarding services or resources provided through the Laupus Computer Lab, contact Nate Saunders (saundersn@ecu.edu) or Larry Bone (bonel@ecu.edu).
The entrance to the new University Writing Center (part of Student Services) located on the 3rd floor of Laupus Library.

The University Writing Center is Here to Help

Writing well is vital to student success at ECU and beyond. While writing is an important mode for communicating with others, it is also a primary tool for learning and thinking. Writing helps us discover new ideas, think more clearly about concepts and problems, and become active members of various disciplines.

The University Writing Center supports the writing that students do all over campus. For years, the UWC has provided that support in a number of locations and online, striving to be accessible and convenient to writers across campus. The UWC is now permanently located on the third floor of Laupus Library.

Maintaining a UWC site on West Campus has always been important to reaching students whose busy schedules don’t often allow them to visit the writing center on East Campus. During the Fall of 2011, plans were discussed with the director of Laupus Library to find a lasting solution to this concern. In January of this year, the UWC opened in the new Laupus 3508-E location.

This new space provides the UWC with a chance to help students become better writers. When students visit the UWC in Laupus, they meet with a tutor one-on-one to discuss whatever writing they are currently doing. The tutors can make suggestions about the writing and offer explanations for guidelines or rules that may seem confusing, but ultimately expect the student to take ownership of their work and make any final decision about the writing.

Tutors at the UWC are guides who help students develop new skills and a better understanding of everything that goes into a successful piece of writing. They work with writers at any point in their process – from brainstorming at the start of an assignment to formatting citations in a near-finished draft.

The UWC tutors who work in the Laupus location are also more familiar with the kinds of writing that happen in the various colleges and departments on West Campus. Understanding the conventions and expectations of those disciplines and audiences is vital to producing effective writing. The UWC is excited to be more accessible to all the West Campus faculty, students, and librarians so that the writing center can become a bigger part of the student support system.

Many students in programs on West Campus have to write for Distance Education courses, which is why the UWC supports writing electronically, through an Online Writing Lab. DE students can submit writing and questions electronically and receive feedback from tutors without having to come to campus.

For more information about the UWC, including site hours and other FAQs, visit www.ecu.edu/writing/writingcenter/ or contact us by phone.
